WE GENERATE AND INSPIRE TRUST

The IFS Food Standard analyzes products and production processes to assess a food producer's ability to produce safe, authentic and quality products in accordance with legal requirements and customer specifications. Our production of wafers and powder mixes for ice cream shops, coffee shops and pastry shops are IFS certified.

The BRCGS Packaging Materials Global Standard helps a factory or operation demonstrate that it is supplying quality-assured, legally compliant and authentic products. Our plastic and paper packaging production is BRCGS certified.

This seal certifies that the paper, cardboard and wood used in our products come from certified sustainable forests. Search for our FSC-certified products.

WE CONTRIBUTE TO A CIRCULAR ECONOMY AND WE ARE COMMITTED TO GREEN ENERGY

Towards a carbon-neutral future

We have installed photovoltaic panels on the roofs of our production plants, thus using solar energy and contributing to cleaner energy in our production.

We use materials with a low environmental impact

We extend the life cycle: recycled, recyclable or reusable products.
